FOR IMMEDIATE RELEASE

A prominent Eugene ophthalmology practice will undergo a change next year. Drs. I. Howard Fine and Richard S. Hoffman welcome Dr. Annette Chang Sims as a partner beginning in January. This comes as Dr. Mark Packer leaves the practice to pursue a new career path. Sims has been seeing patients in Eugene for six years, the last two of them with Drs. Fine, Hoffman & Packer. Her expertise in glaucoma adds to the extensive treatment options available for local patients at their clinic at 1550 Oak Street, Suite 5, in downtown Eugene. Packer has been with the practice for 12 years.

Drs. Fine, Hoffman & Sims specialize in providing innovative diagnostic and treatment options for a comprehensive range of eye problems and conditions, including glaucoma, cataract and refractive therapies, and corneal and external diseases.
