

CORD IOL

Are you in need of cataract surgery? Are you looking for a solution that may also eliminate or reduce your need for glasses?

Dr. Richard Hoffman is currently participating in a research study to evaluate an investigational intraocular lens (IOL) for patients with cataracts.

If you have cataracts, you may be eligible to participate in this research study.

Now is a great time to come in for an evaluation. For more information or to set up an appointment, please call (541) 687-2110 or email **Stephanie Neubert** at stephanie@finemd.com.

You may be a candidate if:

- You have cataracts in both eyes
- You are 22 years or older
- You have had no previous eye surgeries
- You have no ocular health issues other than cataracts (i.e. glaucoma, macular degeneration)
- You have no systemic health issues or autoimmune conditions
- You are not taking certain medications such as Flomax
